

DYNASTY

PEB92 Series

PRESSURE INDEPENDENT CONTROL VALVE

Compact Design
Tolerates Heavily Contaminated Water
Removable Cartridge

PEB92 DYNASTY TECHNICAL SPECIFICATIONS

The new Dynasty range of PICV has been developed to give all the advantages of the existing PICCV range with the added benefit of being designed and tested to **operate in heavily contaminated water**. The valve has a **Linear characteristic** and has been designed to allow the internals to be removed, clean and replaced without affecting the performance of the valve. The Dynasty valve is designed and manufactured in Italy to the highest standard and can be incorporated into one of Pettinaroli UK's off the shelf or bespoke designed pre assembled kits.

FEATURES & BENEFITS

- ✓ Designed for use in **HEAVILY CONTAMINATED** water
Life-tested according to proprietary **test with dirty water**, constantly contaminated by **900 PPM of Iron Oxide Fe2O3 (5 microns)**
 - ✓ **COMPACT** Size
 - ✓ **EASILY ACCESSIBLE & MAINTAINABLE** Cartridge
 - ✓ Designed and Fully **MANUFACTURED IN ITALY**
 - ✓ **SIMPLE** Pre-setting of valve
 - ✓ Designed for **FAN COIL UNITS, CHILLED BEAMS** and **HEAT INTERFACE UNITS.**
- ✓ **ACCESSIBLE** cartridge for easy maintenance

- Headwork and its diaphragm can be **easily accessed** to perform maintenance, **cleaning or replacement** procedure

A key feature of the Dynasty valve is the **ability to work in heavily dirty water**. Pettinaroli recommend that all water distribution systems are properly flushed. For those systems where the water quality is poor the Dynasty has been **designed to operate longer** than any other PICV on the market and has the **added feature** that the valve can easily be disassembled, cleaned and the cartridge replaced

INTERNAL PRESETTING with stroke reduction of the control valve

- It is possible to set the selected flow by following some simple steps:

PEB92 DYNASTY COMPLETE RANGE

The new Dynasty range of PICV has been designed to give all the advantages of the existing PICV valve range with the added benefit of operating in heavily contaminated water. The valve has a Linear characteristic and it has also been designed to allow the internals to be removed, clean and replaced without effecting the performance of the valve.

APPLICATIONS

The new Dynasty range of PICV has been designed to provide flow limitation and temperature control of heating and chilled water systems to terminal units. The Dynasty valve provides good control of water to water heat exchangers and is **ideal for use in Heat Interface Units** where water quality is difficult to maintain, due to the difficulty in accessing every unit. The Dynasty valve can also be fitted in valve assemblies to be connected to Fan Coil Units

PEB92 DYNASTY

Dynasty PICV - Externally Adjustable 1/2" - 2" PICV with Linear Characteristic with removable cartridge and test points. DZR Body with Female BSP Connections. Maximum Flow rate of 14000 l/h.
